

# STUBBLE BUSTER

## PRODUCT INFORMATION

STUBBLE BUSTER is a nitrogen enhanced microbial inoculant. STUBBLE BUSTER is designed to accelerate the decomposition of crop residue after harvest. STUBBLE BUSTER provides humic acid, fulvic acid and food sources to feed the microbes along with specially selected microbial species known for their ability to break down organic matter. This in combination with high concentrations of these organisms (CFU-Colony Forming Units) STUBBLE BUSTER will enrich and renew the health of the soil.
